PUC Urges Electricity Conservation

The Public Utility Commission (PUC) urges Texans to conserve power indefinitely as record drought and high summer temperatures continue throughout the state.

“We all need to use electricity wisely for the next few weeks,” said PUC Chairman Donna Nelson. “Our improving economy, along with the hotter than normal summer, is creating an extremely high demand for electricity in our state.”

The National Weather Service has issued either a heat advisory or an excessive heat warning for most of the state. Texas has experienced record-high electricity demand for three days this week.

The PUC advises residential and business customers to adjust air conditioning thermostats at least two degrees higher and turn off unnecessary lighting. Customers also are being asked to run dishwashing and laundry appliances either in the morning or after sunset. In the summer, electricity usage peaks between 3 p.m. and 7 p.m.

The current conservation alert can be found the PowerfulAdvice section on the PUC Web site by linking to the colored box near the lower right corner of the PUC home page www.puc.state.tx.us

**Conservation Needed
Power Watch**

On YELLOW days, extra conservation measures are urged because of a chance that electricity shortages may occur during the peak usage hours. Check other no or low-cost conservation tips and other energy efficiency improvements you can make to your home by clicking on the links from the Web page: <http://www.puc.state.tx.us/agency/conserves/Conserve.aspx>

Go to www.powertochoose.org to see if you can save money by switching to a lower cost retail electricity provider. Price offers are at historical lows in the Texas retail electric competitive market. Your choice of electric provider does not affect the reliability of your electric service, the frequency or duration of outages, or the time it will take to have your electric service restored if an outage occurs.

Information about bill payment assistance, low-income weatherization and energy efficiency measures is available on the PUC Website and by phone toll-free at 1-888-782-8477.
