Overview of PUC Internal Audit Fiscal Year 2016 Annual Audit Plan

Introduction

This document provides the Fiscal Year 2016 Annual Audit Plan as required by *The Texas Internal Auditing Act (Texas Government Code, Ch. §2102.008)*. This plan provides our vision of Internal Audit efforts for the fiscal year, allocating resources to the most critical areas within the Public Utility Commission (PUC). Projects were identified for the Audit Plan by using a risk assessment model that considered input from PUC management. Using that input, Internal Audit exercised auditor judgment in prioritizing projects for the coming year.

Internal Audit's Vision

To be a valued, trusted and sought after partner with management. To provide a product that contributes to the enhanced value of the Public Utility Commission of Texas.

Internal Audit Objective

To assist in the effective discharge of the agencies responsibility to maintain:

- 1) Effective and efficient operations
- 2) Reliability of financial and operational reporting
- 3) Compliance with laws and regulations
- 4) The safeguarding of agency assets

Audit Charter and Definition

The Audit Charter approved by the Commission January 2013 provides authorization to Internal Audit personnel for full, free, and unrestricted access to any of the agency's systems, records (manual or electronic), functions, property, and personnel relevant to the performance of statutory responsibilities and duties assigned by the Commissioners or the Executive Director. The charter also defines reporting relationships, the scope of audit work, audit reporting and follow-up responsibilities.

The Definition of Internal Auditing states the fundamental purpose, nature, and scope of internal auditing.

*Internal auditing is an independent, objective assurance and consulting activity designed to add value and improve an organization's operations. It helps an organization accomplish its objectives by bringing a systematic, disciplined approach to evaluate and improve the effectiveness of risk management, control, and governance processes.*¹

¹ Institute of Internal Auditors – *International Professional Practices Framework*, January 2009

Risk Assessment

Internal Audit (IA) develops the Audit Plan by first conducting a comprehensive risk assessment of agency program and activities which includes obtaining input from agency management. Part of the risk assessment process is preparing a risk assessment matrix which is sent to management in order to solicit feedback regarding areas of risk or concern. Internal Audit had a 100% response rate to the risk assessment matrix.

A risk assessment is performed each year to continually identify the agency's audit universe and to prioritize the relative risk of each auditable activity within the audit universe. Through this ranking process, the auditor can more objectively and effectively identify and present a risk based plan to agency management and the Commission, for review and approval.

The goal of the risk assessment process is to determine units exposed to high risk and to allocate limited audit resources appropriate to that level of risk. Steps to accomplish this purpose, which ultimately results in audit selection and inclusion in the annual audit plan, include the following:

1. Identifying and cataloging auditable activities (the "audit universe") of the agency.
2. Selecting the criteria (risk categories) used to identify the significance of and likelihood that conditions and/or events may occur that would adversely affect the organization.
3. Weighting the risk factors in terms of importance to management, external influences, and the auditor.
4. Preparing an audit selection schedule that includes the factors for each audit universe item.
5. Computing the weighted score for each universe item and the cumulative factor score.
6. Selecting and prioritizing the audits to be conducted.
7. Examining available resources.

The following functional areas were asked to participate in the risk assessment process:

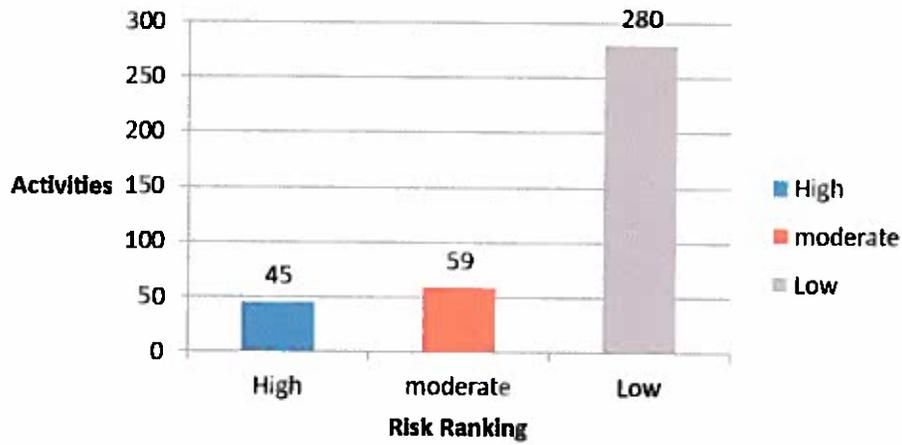

- Commission Advising and Docket Management
- Information Services
- Agency Counsel
- Media
- External Affairs
- Budget and Fiscal Oversight
- Human Resources
- Rate Regulation
- Customer Protection
- Legal
- Competitive Markets
- Infrastructure and Reliability
- Oversight and Enforcement
- Water Utilities

Internal Audit prepared a worksheet for each functional area that contained a listing of activities conducted in each area. Each functional area was asked to complete the worksheet by reviewing the activities previously identified by Internal Audit and providing any updates, deletions or corrections.

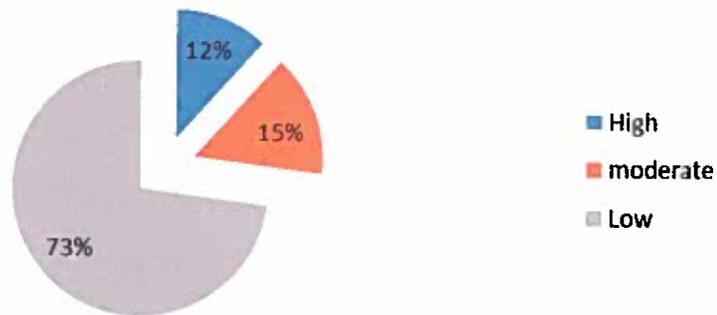

Individual activities were ranked based on probability and impact and assigned a score from one (low risk) to five (high risk) and the sum of all those scores determined the audit's risk ranking.

The scores were divided into the following categories, high = 5.00 - 3.75; moderate = 3.74 - 2.50; low = 2.49 - 1.00. Those activities with a high risk ranking were evaluated in order to prepare the annual audit plan. A total of 384 activities were identified and ranked, 45 or 12% were ranked high, 59 or 15% were ranked moderate and 280 or 73% were ranked low. There was an increase in the number of activities identified this year compared to last year, this increase can be attributed to a higher rate of return of the risk assessment compared to last year.

Number of Activities Ranked High, Moderate or Low

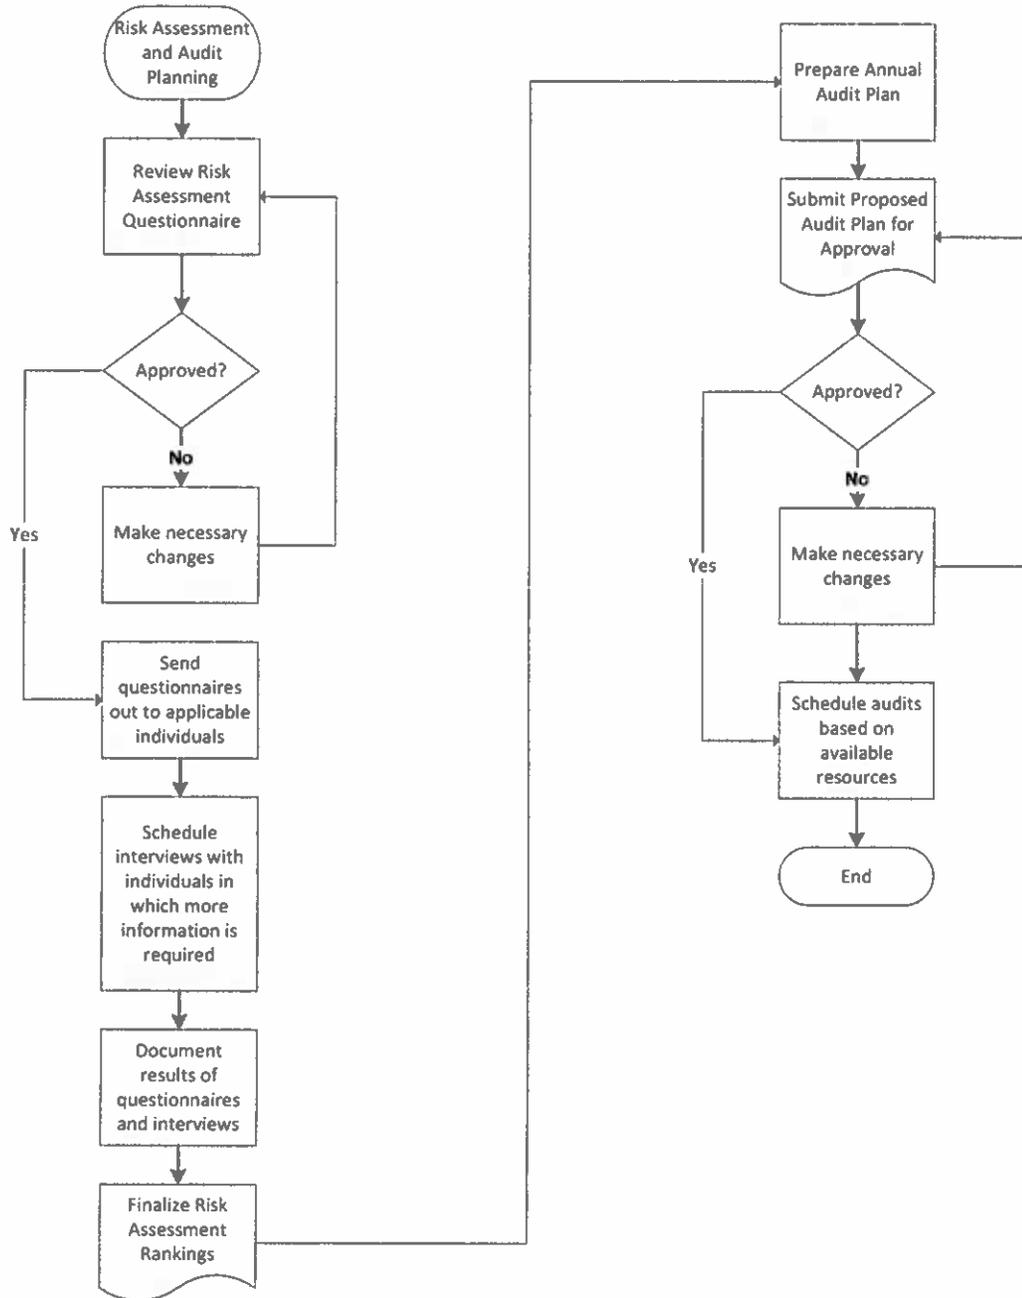

Percentage of Activities Ranked High, Moderate or Low

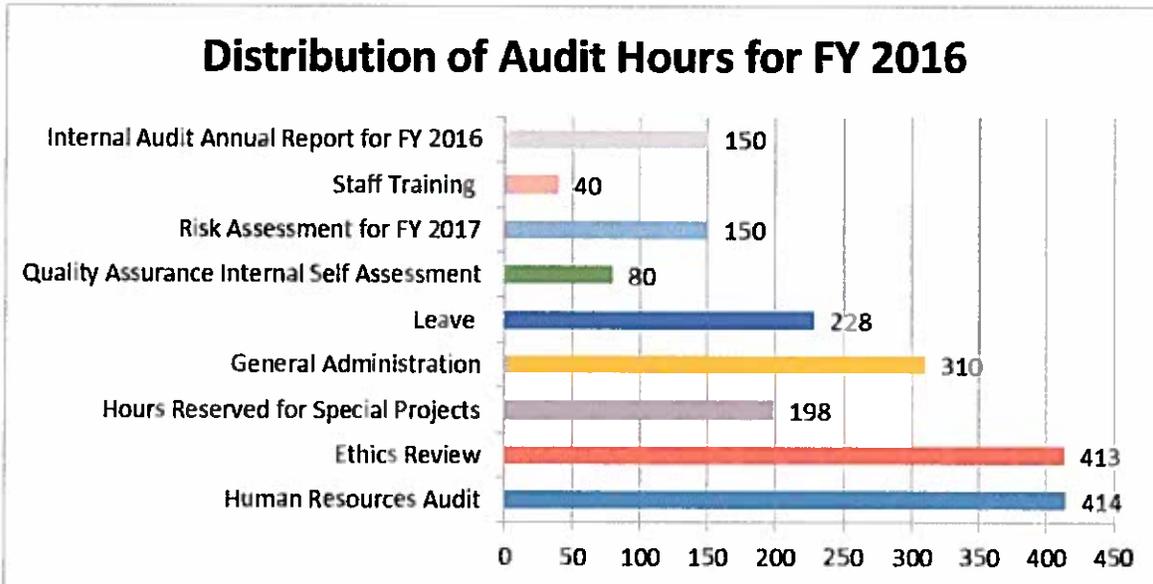

The following diagram depicts a high level view of the risk assessment and audit planning process.

Public Utility Commission
Internal Audit
Risk Assessment and Audit Planning Process

The Chart below shows Internal Audit's budgeted time allocations for the coming fiscal year.

Acceptable Level of Risk

Although the audit plan contemplates a range of audit effort, it does not provide coverage for all PUC components or systems. Internal Audit attempted to maximize limited Internal Audit resources to provide reasonable coverage of the business activities requiring the most attention.

However, because Internal Audit cannot address every risk area, it is important for the Commission and management to understand the limitations of the audit coverage and the risks they assume in areas not audited. Internal Audit believes that this plan allocates Internal Audit resources to the most important priorities and risks of the agency at this point in time.

Internal Audit is committed to being a valuable resource in improving the agency's operations and proposes a plan that targets key processes, yet builds flexibility to allow for Commission and management requests that require immediate attention.

Fiscal Year 2016 Internal Audit Plan Allocation

The Audit Plan depicts hours allocated to audit engagements in various programs and Divisions of the commission and is shown in Schedule 1. Detailed objectives will be formalized for each engagement during the planning process. The Audit Plan includes the following sections:

Projects Carried Forward

No projects were carried forward from FY 2015.

Financial / Performance Assurance Activities

Internal Audit provides assurance services for the agency which are defined as objective examinations of evidence for the purpose of providing an independent assessment on risk management, control, and governance processes for the organization. Examples may include financial, compliance, economy and efficiency, effectiveness, investigations, and information technology engagements.

Special Initiatives

In addition to assurance and consulting engagements, Internal Audit allocates resources toward special initiatives. These initiatives include any liaison activities which may occur during the year and special requests to be responsive to the immediate needs of the Commissioners and management.

Consulting / Advisory Activities

By definition, internal auditing includes the provision of consulting services. Consulting services are advisory and related client service activities, the nature and scope of which are agreed upon with the client. These activities are intended to add value and improve an organization's governance, risk management, and control processes without the internal auditor assuming management responsibility.

Examples include counsel, advice, facilitation, and training. Progressive Internal Audit departments provide additional management assistance or consulting services to their organizations. Upon request, Internal Audit will provide both formal and informal advice and suggestions on management issues, concerns, and draft policies and procedures.

Additionally, Internal Audit will provide representation on PUC committees and work groups as needed and requested by the Commission or executive management. By providing consulting or advisory activities, Internal Audit adds value to PUC beyond assurance services and assists in strengthening agency internal controls.

Administrative Activities

Internal Audit included hours for various administrative activities, some of which are mandated either by the professional standards or required by statute. Leave time for Internal Audit is also included to show a full picture of hours to be used by Internal Audit during the year.

Professional Standards

Internal Audit adheres to *Government Auditing Standards*, as promulgated by the U.S. Government Accountability Office and the *International Standards for the Professional Practice of Internal Auditing*, as promulgated by the Institute of Internal Auditors which includes the *Code of Ethics*. In addition, Internal Audit conforms to requirements found in the *Texas Internal Auditing Act* (Texas Government Code §2102) and complies with all policies and procedures of the PUC.

Closing

Audit plans act as a guide for audit departments. Internal Audit's plan includes proposed projects and other initiatives to perform during the year. Internal Audit budgeted time for special requests in order to be responsive to the immediate needs of the Commission and management as they may arise throughout the fiscal year.

As discussed above under "Acceptable Level of Risk" the Internal Audit plan does not, nor is it intended to, address or provide complete coverage for all PUC components or system risks. Internal Audit believes that this plan allocates the

resources of Internal Audit to the most important priorities and risks of the agency at this point in time.

Internal Audit wishes to thank PUC management and staff for their assistance in providing information which led to the development of this proposed plan. In addition, Internal Audit looks forward to helping the agency meet its objectives this fiscal year. For further information on the FY 2016 Internal Audit Plan, please contact Darrell Carter, at (512) 936-7448 or by email at darrell.carter@puc.texas.gov
