**Electricity Price**

Average Monthly Use	1500 kWh	2500 kWh	3500 kWh
<b>Minimum Price per kWh</b>	<b>17.2¢</b>	<b>13.8¢</b>	<b>13.8¢</b>
Average Price per kWh at RTSP of \$50/MWh	<b>18.6¢</b>	<b>15.2¢</b>	<b>15.1¢</b>
Average Price per kWh at RTSP of \$100/MWh	<b>24.8¢</b>	<b>21.4¢</b>	<b>21.4¢</b>

The Minimum Price per kWh above represents the minimum price per kWh that will be applied to the monthly kWh usage and applicable kW demand for any given month for service provided under this EFL. The Minimum and Average Price calculations incorporate no demand for 1500 kWh, 11 kW demand for 2500 kWh and 16 kW demand for 3500 kWh based on a 30% load factor.

The Average Prices per kWh above are samples based on average Real-Time Settlement Point Prices (RTSP) of \$50 and \$100 per MWh - your actual Average Price per kWh will depend on your usage and the pricing formula below:

Large Service Provider (LSP) POLR Rate (in \$ per kWh) = (Non-bypassable charges + LSP customer charge + LSP energy charge + applicable LSP demand charge)/total monthly kWh used

Where:

- Non-bypassable charges shall be all TDU charges and credits for the appropriate customer class in the applicable service territory, and other charges including ERCOT administrative charges, nodal fees or surcharges, reliability unit commitment (RUC) capacity short charges attributable to LSP load, and applicable taxes from various taxing or regulatory authorities, multiplied by the level of kWh and kW used, where appropriate.
- LSP customer charge shall be \$0.025 per kWh.
- LSP demand charge shall be \$2.00 per kW, per month, for customers that have a demand meter, and \$50.00 per month for customers that do not have a demand meter.
- LSP energy charge shall be the sum over the billing period of the actual hourly RTSPs, for the customer's load zone that is multiplied by the number of kWhs the customer used during that hour and that is further multiplied by 125%.
- The minimum LSP energy charge in this service area is 4.93¢/kWh.
- "Actual hourly RTSP" is an hourly rate based on a simple average of the actual interval RTSPs over the hour.
- "Number of kWhs the customer used" is based either on interval data or on an allocation of the customer's total actual usage to the hour based on a ratio of the sum of the ERCOT backcasted profile interval usage data for the customer's profile type and weather zone over the hour to the total of the ERCOT backcasted profile interval usage data for the customer's profile type and weather zone over the customer's entire billing period.
- RTSP interval prices are published at [www.ercot.com](http://www.ercot.com).

To determine your current month's price, use the formula above with your estimated monthly usage, go to [txu.com/formula](http://txu.com/formula) or call 1-800-242-9113. For updated TDU delivery charge factors go to [txu.com/tduchargesbiz](http://txu.com/tduchargesbiz).

Average prices per kWh listed above do not include facility relocation fees or other charges ordered by a municipality. For more information, see [txu.com/municipalfees](http://txu.com/municipalfees).

*McAllen and Mission service area customers formerly served by Oncor will not be subject to the following AEP Central TDU Surcharges: Transition Charges 2 & 3, Nuclear Decommissioning Fee, System Restoration Charge and associated Accumulated Deferred Federal Income Taxes (ADFIT).*

**Other Key Terms and Questions**

Each month you will also be billed all taxes, including sales tax, and reimbursement for the state miscellaneous gross receipts tax as applicable.

See Terms of Service Agreement for a full listing of fees, deposit policy, and other terms.

Type of Product	Indexed
Contract Term	Month-to-Month

<b>Disclosure Chart</b>	Do I have a termination fee or any fees associated with terminating service?	No	Early Cancellation Fee: \$0.00
	Can my price change during the contract period?	Yes	
	If my price can change, how will it change, and by how much?	We will provide you with at least 14 days' advance written notice before changing the pricing formula for this plan, except to reflect actual changes in TDU charges; changes to the Electric Reliability Council of Texas or Texas Regional Entity administrative fees; or changes resulting from federal, state or local laws or regulatory actions that impose new or modified fees or costs that are beyond our control.	
	What other fees may I be charged?	See Service Charges and Fees Section of your Terms of Service Agreement for non-recurring fees.	
	Is this a pre-pay or pay in advance product?	No	
	Does the REP purchase excess distributed renewable generation?	No	
<b>Disclosure Chart</b>	Renewable Content	This product is 6% renewable.	
	The statewide average for renewable content is	19%
