RE: Project 23225 as it relates to the return of NXX codes designated Unavailable for Assignment (UA)

Dear Mr. Colaco:

The Texas Public Utility Commission Staff is requesting that the North American Number Administrator initiate an industry conference call to discuss the NXX codes designated UA in the 281, 713, 832, 409, and 936 NPAs in order to identify those codes that are eligible to be released for assignment. In order to facilitate the discussion, please post on the NANPA Document Distribution Service Website a list of the NXX codes designated UA in the 281, 713, 832, 409, and 936 NPAs and please notify PUC staff when those codes are posted.

The Texas Public Utility Commission will schedule a workshop in conjunction with this conference call and will post information on the PUC website and run a notice in the Texas Register with further details under Project 23225. The workshop and conference call on the codes designated UA in the 281, 713, 832, 409, and 936 NPAs will be conducted Thursday, October 17, 2002 beginning at 1 P.M. Central Time. Additional conference calls will be scheduled to discuss the NXX codes designated UA in the remaining NPA-NXXs in Texas.

Thank you for arranging this and future conference calls on this subject.
