Your average price for electricity will vary according to your usage and the components shown in the LSP rate formula below:

LSP Rate (in \$ per kWh) = (Non-bypassable charges + LSP customer charge + LSP demand charge + LSP energy charge)/kWh used

Where:

- Non-bypassable charges shall be all TDU charges and credits for the appropriate customer class in the applicable service territory, and other charges including ERCOT administrative charges, nodal fees or surcharges, RUC capacity short charges attributable to LSP load, and applicable taxes from various taxing or regulatory authorities, multiplied by the level of kWh and kW used, where appropriate.
- LSP customer charge shall be \$0.025 per kWh.
- LSP demand charge shall be \$2.00 per kW, per month, for customers that have a demand meter, and \$50.00 per month for customers that do not have a demand meter.
- LSP energy charge shall be the sum over the billing period of the actual hourly RTSPs, for the customer's load zone that is multiplied by number of kWhs the customer used during that hour and that is further multiplied by 125%.
- **RTSP interval prices are published at www.ercot.com or by calling Customer Service at toll free 1-(866) 917-8271**

Some locations may be subject to a TDU Underground Facilities and Cost Recovery Charge authorized by their city that is not included in the price above. See your TDU's tariff for a list of cities and authorized charges.
